SHADOW BOXIN' ON THE INFLATION FRONT

MOVING? Please use form inside
paper and give full information.
Mailing list is run on Friday for follow-
ing week.

Now that the Administration has
declared war on inflation just about
everybody is agreeable, as long as the
restrictions apply to somebody else.
The trouble right now is that war has
been declared, but the troops and
battle plans ain't in place and ain't
likely to be for some weeks yet. As a
matter of fact, the various watchdogs
in the Government ain't got their stories
together yet and anyone who ain't
confused by now just ain't been payin'
attention.

Bureaucrats Ignored Own Experts, Warned Protection for Predators, Producers Who Protest Are Facing Entrapment

The federal government spends
millions of dollars warning people of
the hazards of high blood pressure,
then turns right around and spends
more of our dollars printing such
garbage as the recently-released
"Golden Eagle Management Plan",
guaranteed to raise blood pressure at
least 50 points.

Texas Sheep and Goat Raisers'
Association president Norman Rous-
selle described the plan as "totally
inadequate". Rouselle says it's
absurd that the Department of the
Interior expects sheep and goat
producers of Texas to try to protect
their livestock in the manner
described.

Just what manner is described?
Essentially nothing. The "plan"
concentrates almost entirely on
increasing eagle numbers. Most of the
balance of the paper is given over to
outlining ways of increasing law
enforcement in eagle country, and
only as an afterthought do the
Interior staffers address the real
problem - that of golden eagle
depredation on livestock.

The paper lists six alternatives:
first, do nothing about anything;
second, issue kill permits for
depredating eagles; third, provide
federal compensation for stock losses;
fourth, provide insurance for stock
losses; fifth, continue the present
(non)program; and sixth, develop and
implement a golden eagle manage-
ment plan. This last item is not even
a little strange because the
publication it's printed in is supposed
to be just such a plan. But never
mind.

Only the last two options are
actually recommended. The option of
issuing kill permits is soundly
denounced and was apparently
included only as an excuse to do so.
Permits were, by the way,
recommended by Interior's field staff
(the only ones who know anything
about eagles) but vetoed by the brass.

TS&GRA's executive secretary,
Bill Sims, says Interior Secretary
Cecil Andrus "just ignored his field
people and did what was politically
attractive to him."

As for continuing the existing
program, page 11 of the "plan" says
this will include "hazing techniques
such as sirecraft, rockets, explosives,
recorded distress calls, distress
chemicals and other slight and sound

Fed Cattle, Hogs Up Monday At Major Markets, Receipts Smaller

Winter storms continued to plague
the livestock marketing situations
over the weekend at the major
terminal market centers. Slaughter
cattle and hogs receipts were around
10% below those a week earlier. Fed
steers and heifers posted solid gains
at all points and hogs were \$1 to \$2.50
above a week ago at the various
markets.

Price trends, quotations on choice and
prime steers and heifers and the
mixed good and choice grades and on
US 1-3 hogs scaling 200 to 250 lbs.
included:

President's Guidelines are gonna work, or we face mandatory price and wage controls. Big Labor has already declared that Barry Bosworth's interpretation that fringe benefits and pension money are to be included in the permissible 7% wage hikes will be ignored. As of now th' President's Inflation Fighters are makin' plans to include these benefits out of th' 7% increases, which will enable Big Labor to chalk up gains on actual dollars of as much as 25 to 30% increases, without breakin' the 7% barrier.

It looks like th' Labor Boys have already out-figgered Carter & Co., so far as their end of the deal goes. Now Carter and his Inflation Fighters are gittin' around to Blness. Accordin' to th' noise from th' White House Carter aims to impose sanctions on any Businesses that don't toe th' line, whatever th' Line turns out to be. Th'

White House pop-nills are wavin' a Big Stick at Blness and threatin' to boycott violators of Administration orders, which ain't been promulgated yet. These orders may or may not be outlined before Christmas, th' odds are they will not be ready until after New Year.

The odd thing about these threats of Sanctions agin Businesses is there is no law which gives th' President or his Burrocrats any right to boycott anybody. It does appear that th' time has arrived when th' Politicians and th' Burrocrats are gonna have to have the slack jerked outta them in Court. Just th' Other day a judge ruled that head of th' FTC could not be involved in television commercials under scrutiny by his department, since he had already expressed strong opinions about kiddie's sugary cereals. Now another outfit is takin' USDA's Carol Tucker Foreman to court for th' same reason: she has already expressed bias concernin' meat packagin', etc. Mebbe lawin' is

th' answer to Burrocratic arrogance. Ever thine.

The Editor.

P.S.: Uncle Dunk figgers that what some of th' consumer & health nuts really regard as safety lery you & ma is some kind of padded cell where we can't eat, drink, drive or ride any thing that is likely to injure us as we enjoy our stupidity. It is a shame those folks tryin' to protect us ain't as smart as they think they are, and this padded cell they got planned ain't gonna work. Folks are already fed up to here with those scare stories. Dunk notes that newspaper prices (th' kind of paper this publication uses) has risen since 1970 from \$152 per ton to \$345 per ton. But this ain't near as much as the Postal Rates have gone up. Dunk figgers now that th' Arabs & Israails are back on high center after th' Camp David euphoria, and th' trade lewis in Geneva are stuck in th' mud, it'll be a good idea for Carter & Co. to steer clear th' Franken mess. It's bad enough now without any of

Replacement Cattle Post Fifth Week Of Better Prices

St. Joseph, Dec. 1 (USDA) — National feeder cattle and calf receipts this week 227,000 compared with 135,200 the holiday shortened period last week and 253,000 a year ago. Prices for feeder cattle and calves shot sharply higher this week to mark the fifth consecutive week of price gains. Improved moisture conditions and relatively warm growing conditions over much of the wheat pasture country at least one major factor spurring demand and pushing prices.

Prices moved 1.00-5.00 higher with several locations reporting gains upwards of 10.00 on calves. The only exception to the higher trend this week cropped up the Wyoming area where yearling steers sold steady to 2.00 lower with yearling heifers steady to 3.00 off, instances 4.00 lower.

She's an American Black Maine

That's what she is — an American Black Maine. A purebred, registered, black Maine-Anjou cow, the result of years of crossing Maine-Anjou cattle with established U.S. beef breeds for the industry to finally dictate a cross that would work. It had to be black and it had to be an animal that was useful — not just a passing fancy.

The American Black Maine-Anjou Association was designed by cattlemen for cattlemen. Fullbloods are designed as three-quarter Maine-Anjou and one-quarter Angus, and things like branding identification and multiple sire groupings are just two of the many programs which are geared to a down-to-earth cowman's way of thinking and breeding superior beef cattle. The fullblood heifer you see here is backed by \$100,000 in prepaid registration fees, which has been earmarked for the Association's first year advertising and operating expenses. The Association is just as solid as she is.

If you're serious about breeding superior beef cattle that are black, contact the American Black Maine-Anjou Association today for more information.

I am interested in learning more about American Black Maine-Anjou cattle. Please have the Association contact me.

thing about the "plan" is its obviously antagonistic attitude toward producers. On page five the planners state that depredation control assistance "will be commensurate with the number of requests" for that assistance. In plain English this means that no assistance, not even the next-to-nothing kind they propose to give, will be offered without a whole of a demand for it.

The first item under "law enforcement", however, requires Animal Damage Control personnel to notify law enforcers "of all requests for assistance." In other words, the only way a producer can get any help at all is to hound ADC about his problem, thereby setting himself up to be watched like a hawk (pardon by the law enforcement people).

Consider the type of assistance he can expect to receive. The producer will still have the same problem after he receives it. If he then becomes frustrated enough to break down and help himself, the law enforcers will be forewarned and waiting to cart him away.

In the end there are likely to be precious few requests for assistance/surveillance and the interior boys can

chirp, "See, there've been no requests so there must be no problem." Last anyone entertain the notion that this surveillance idea is more paranoia than probability, a paragraph from page 13 of the report should clear up any doubts. Says the report, "Undercover efforts to detect illegal eagle shooting and/or poisoning would be undertaken in suspected problem areas."

Simply stated, the Golden Eagle Management Plan is a spiteful slap in the face to livestock producers and definitive proof that federal Interior brass don't give a flying squat about the losses their predatory birds inflict on someone else's property and livelihood.

TS&GRA's Sims says of the report, "It's amazing how little a group of well-educated grown men can do if they put their narrow minds to it."

BRANGUS The Bull You Need.

To make it in today's cattle business, you need a bull that will increase profits — You need a Brangus!

A Brangus bull costs little to maintain and at the same time sires calves that bring top dollar at the market. Because of his 3/8 Brahman—5/8 Angus heritage, a registered Brangus bull is hardy and adaptable to climatic extremes. He does well on the range and is disease and pest resistant.

A Brangus bull is a virile and aggressive breeder and settles cows quickly. Cows bred to a Brangus bull experience few calving problems. Brangus calves gain quickly on feed or forage, averaging 75 to 100 pounds heavier at weaning than English breeds.

But most of all, calves from a Brangus bull are consistently profitable. They lay down internal fat early, and finish early with enough marbling to grade choice. Brangus calves are preferred—by stockers, feeders, packers, and consumers. If you want PROFIT, you need BRANGUS!

Commercial Heifers, Hereford Bull Sale Scheduled Jan. 28

The 10th annual Texas Hereford Association-sponsored commercial female sale, scheduled in conjunction with the 53rd Southwestern Exposition and Fat Stock Show Jan. 24 through Feb. 4, will be joined this year by a Texas Select Bull Sale.

Commercial females will begin selling at 1 p.m. Sunday, Jan. 28, in Sale Barn 0 on the Stock Show grounds. Bulls will follow the females in the auction ring.

Jack Chastain, executive secretary of the T.H.A., said the females will be judged in pens of 20 head at 8 a.m. on sale day for prizes totaling \$5,000. He said bulls will not be judged, but will represent blue ribbon winners in many Southwestern shows.

Consignments in the bull sale include 24 head from 18 breeders in Texas and include many sons of Register of Merit and Super Register of Merit sires. Some of the

most prestigious are names in the Hereford breed appear in this bull pedigree.

Approximately 600 head of high quality, commercial females will be in the show and sale. Offerings come from some of the most well-known and highly respected commercial breeding establishments in the state.

"This sale is unique in that it offers buyers an opportunity to purchase heifers that are available only because they are set aside for this Stock Show sale event," said W. R. Watt Jr., Stock Show president-manager. "We are pleased at the growing interest by breeders in this portion of our show."

"Extremely high standards were set by the sale selection committee in choosing bulls nominated for the sale," Chastain said. "Any breeder interested in a top Hereford bull should be able to find exceptional quality in the sale to add breed character and doing ability to his breeding program."

Since the commercial female sale was initiated at the Stock Show in (CONT. ON PAGE 15)

Hereford Bull Sale By SMS Ranch Stated December 8

The Hereford Bull Dispersal to be held at the Abilene Auction Barn in Abilene, Texas on December 8 will feature cattle from one of the oldest ranches in Texas formed in 1882 by the Swenson Brothers.

The herd originally started with Longhorns and then Purebreds Herefords and a few Shorthorns were introduced to upgrade the herd.

negative stock. By selective breeding over many years the Swensons ultimately produced an entire herd of fine Herefords.

E. P. and S. A. Swenson operated almost 300,000 acres in early 1900 with four units which were named Flat Top, Tongue River, Throckmorton and Spur Ranches.

In 1926, the ranching enterprises were incorporated under the name of Swenson Land and Cattle Company and operations continued as a family-owned organization since

that date. The Bull Dispersal will be the first sale held since 1906 and will be managed by Reyes and Reyes, auctioneers from San Antonio, Texas. Catalogs or other information may be obtained by contacting Reyes and Reyes at 118 Nakoma, San Antonio, Texas 78205 or by telephone at 512/840-5186.

males that it would take many days and untold miles to inspect individually," Chastain continued. Females offered are purebred, but not registered heifers. Some will be open and ready to breed, others will sell bred not only to registered Hereford bulls but to bulls of other breeds.

"The females are definitely replacement type heifers that will fit into any breeding program or they can be used to start a commercial herd of exceptional quality with years of proven performance behind them," Chastain added.

Heifer consignors will include such names as Burnett Katzen, well.

The commercial females will be stabled in Sale Barn 6, and the sale barn 3 with the Charles Nellett Jr. ROM Show cattle. The ROM Show is scheduled Jan. 28.

**AVOID CHANGING WELL LEATHERS
FOR MANY YEARS**
Perma-cups are molded urethane,
more wear resistant than nylon.
Perma-cups will outlast leathers 10
to 1. Their tapered design allows only
1/8" wear, instead of 5/8" of a lea-
ther. Much less friction for easier
pumping extends cylinder life greatly.
Perma-cups must be used in a good
or new cylinder, as they do not swell.
Install Urethane Perma-cups, Ure-
thane Check-balls, and Urethane
Pump Rod-guides, and don't pull
them well for many years. Thousands
are in wells that have not been tele-
ported in 5 years! All are available in
standard cylinder and pipe sizes. Write
or call for our catalog. We ship same
day after it is received. This is our 28th
year serving ranchers.

Wool, Mohair Quiet
National wool market review, Dec. 1, (USDA) - Domestic wool price quotations remain firm and about unchanged. Confirmed sales for the territory and fleece slates were nonexistent as small available supplies remain in strong hands. In Texas a small weight of staple and French combing 64's and finer, containing light grass changed. Confirmed sales for the territory recently brought 1.02 and 97
